FINAL EXAMINATION

TRIMESTER 3, 2018/2019

PMT0301 – MATHEMATICS III

(All sections/ Groups)

29 MAY 2019
9.00 a.m. – 11.00 a.m.
(2 Hours)

Question	Marks
1	/10
2	/10
3	/10
4	/10
Total	/40

INSTRUCTIONS TO STUDENTS

1. This question paper consists of **EIGHT** printed pages excluding cover page and statistical table.

2. Answer **ALL FOUR** questions. All questions carry equal marks and the distribution of the marks for each question is given.

3. Please write all your answers in the **QUESTION BOOKLET**. All necessary working steps **MUST** be shown to obtain maximum marks.

Question 1

a) Determine whether $\mathbf{u} = 2\mathbf{i} - 3\mathbf{j}$ and $\mathbf{v} = 8\mathbf{i} - 12\mathbf{j}$ are parallel, orthogonal or neither. Find the angle between the two vectors. (2.5 marks)

b) Find an equation of the plane that contains the line $x = 3 + 2t$, $y = t$, $z = 8 - t$ and is perpendicular to the plane $2x + 4y + 8z = 17$. Give your final answer in the form of $ax + by + cz = d$. (2.5 marks)

Continued...

c) Solve the system of linear equations with Gauss-Jordan Elimination method.

$$x+2y+z=3$$
$$2x+5y-z=-4$$
$$3x-2y-z=1$$

(5 marks)

Continued...

Question 2

a) A company manufactures 200 mobile phones in Week 1, 220 in Week 2, 240 in Week 3 and so on until it is producing 600 mobile phones in Week n. Find the value of n.
(2 marks)

b) Find the coefficient of the term that contains x^6 in the expansion of $\left(x^2-2\right)^5$.(3 marks)

Continued...

c) Below is the frequency distribution table for the time spent (in minutes) by a random sample of 40 students in MMU library.

Time Spent (in minutes)	Frequency
5 – 12	4
13 – 20	10
21 – 28	6
29 – 36	12
37 – 44	2
45 – 52	6

i) Calculate median. Give your answer correct to 1 decimal place. (1.5 marks)

ii) Calculate mode. Give your answer correct to 1 decimal place. (1.5 marks)

iii)Calculate the standard deviation. Give your answer correct to 2 decimal places. (2 marks)

Continued...

Question 3

For a family with four children, let A be the event of at least one child of each gender and B be the event of at most two girls. Assume that a child of either gender is equally likely.

a) Find $P(A)$. (2 marks)

b) Find $P(B)$. (2 marks)

c) Find $P(A \cap B)$. (2 marks)

Continued...

d) Find $P(A|B)$. (2 marks)

e) Are events A and B statistically independent? Explain your answer. (2 marks)

Continued...

Question 4

a) A study shows that 33% of the primary students know how to send emails. If a sample of 10 students are chosen at random from a primary school, calculate the probability of
i) exactly 3 of them know how to send emails. (1.5 marks)

ii) at least 9 students do not know how to send emails. (2 marks)

b) It is knowing that most of the car owners will service their car on average of twice in a year. Find the probability that the car owner will service their car less than 2 times in half a year. (2.5 marks)

Continued...

c) The lifespan of *XYZ* fan is normally distributed with a mean of 3 years and a standard deviation of 0.88 years. What is the probability that a *XYZ* fan chosen at random will last for

i) more than 5.5 years? (2 marks)

ii) less than 2.75 years? (2 marks)

End of Page

Standard Normal Distribution

$$p(z \le z_1) = \frac{1}{\sqrt{2\pi}} \int_{-\infty}^{z_1} e^{-\frac{1}{2}z^2} dz$$

The Normal Distribution Function

x	Φ(X)	x	Φ(X)	x	Φ(X)	x	Φ(X)
